

FLOYD

How to Assemble:

The Form Sectional

Step: 1

Locate the two notched plastic clips on the bottom edge of one Sectional unit. Flip them out so they are pointed away from the unit.

Step: 2

Locate the two triangular metal pins on the bottom edge of the other Sectional Unit. Align the pins with the clips and gently push this unit towards the other unit until the pins slide into the clips. Keep pushing until the two units are flush with one another and the pins are tight in the clips.

Disassembly

To disassemble, simply lift up the side of the unit that has the pins to remove them from the clips.

WARNING ▲

READ ALL INSTRUCTIONS **BEFORE** ASSEMBLY & USE. ADULT ASSEMBLY REQUIRED. KEEP SMALL PARTS AND PACKAGING AWAY FROM CHILDREN

NOTES ON USE:

Keep children and others safe by following these simple rules:

Do not allow any child to play on furniture

Do not allow climbing on any piece of furniture

Do not allow hanging from any piece of furniture

Care:

Mild Spills:

For light spills, blot with a paper towel. For tougher spills, use a mild soap and water mix. To make the soap and water mixture, take 1 teaspoon of a gentle liquid detergent (such as Woolite) and mix it with 16 oz. of water in a bowl or plastic container — do not over wet the material. Do not use any stain removing agents — doing so could diminish their stain-resistance.

Liquid Spills:

When cleaning a liquid spill, immediately blot the fabric surface with a cloth/towel to remove the spilled liquid. To spot clean the spilled area, soak a clean cloth/towel in a soap and water mixture, wring it out and clean the stained area in a gentle circular motion.

Non-Liquid Spills:

When cleaning a non-liquid spill, immediately remove the excess spilled material from the fabric by lifting the spilled material off the affected area with a butter knife and accumulating the spilled material onto a cloth/towel. To spot clean the spilled area, soak a clean cloth/towel in a soap and water mixture and clean the stained area in a gentle circular motion.

If needed, for both Liquid and Non-Liquid Spills, take a damp, clean cloth and go over the affected area to remove any soap residue from the fabric. Do not over wet the material. If the soap and water

mixture does not remove the stain completely, then repeat the above process using a gentle multi-purpose cleaner (such as Woolite Fabric and Upholstery Cleaner). Remember to dry the area as much as possible. You can place a fan nearby to assist!

Additional Info:

For an overall refresh, you can have the Sectional steam cleaned with water only. Any chemical agents could diminish the stain-resistance. The fabric is stain-resistant but not stain-proof. Regular spot-cleaning and maintenance is recommended. Stains that ARE NOT likely to be removed by the methods above include, but are not limited to: oil-based products (such as salad dressing and lotion), wax-based products (such as candle wax and crayons), ink marks and mustard. For any of these stains, we recommend consulting a professional upholstery cleaner.
